

Hindustan Powerprojects Private Limited (HPPPL) is a leading independent power producer with a substantial portfolio of solar and coal based thermal power generating assets. Committed to generating sustainable energy solutions, HPPPL boasts extensive expertise in power generation, development, and operations.

Supported by a large team of professionals across various locations, the company has established itself as a pioneer in utility scale solar PV projects and a leader in the thermal power generation sector. Today, HPPPL features a diversified operating power generation portfolio of considerable capacity, producing a significant amount of solar and coal based thermal energy. The state-of-the-art coal based thermal power plants operate at a Plant Load Factor (PLF) of 80%, one of the highest in the industry.

The company has successfully commissioned projects across several Indian states, including Madhya Pradesh, Tamil Nadu, Karnataka, Bihar, Gujarat and Assam, as well as in international markets such as Japan, England, Germany, and Italy. With a strong emphasis on expanding into other emerging markets both in India and globally, HPPPL is well-positioned for significant growth within the infrastructure sector.

In alignment with its vision for future growth, HPPPL has also expanded into the coal mining industry. Leveraging its robust background in energy infrastructure, the company is poised to capitalize on the anticipated increase in coal demand over the next two decades. Recently, HPPPL secured two coal mines from subsidiaries of Coal India in the states of Jharkhand and Chhattisgarh, marking a significant milestone in diversifying its portfolio and contributing to India's coal supply.

The first project involves Central Coalfields Limited (CCL), a subsidiary of Coal India Limited, which has awarded HPPPL the contract for the Saunda D mine in Ramgarh Cantt, Jharkhand. With a rated capacity of 6.2 MTPA and a lifespan of around 25 years along with a declared grade of G4-G6 coal (5500-6400Kcal/Kg) it is suitable for power generation, sponge iron and cement sectors.

The other project awarded to HPPPL is from South Eastern Coalfields Limited (SECL), another subsidiary of Coal India Limited located in the Chirimiri district of Chhattisgarh. This mine has a rated capacity of 1.35 MTPA, with all coal expected to be extracted within 18 years. The expected

coal grade is G4-G5 (5800–6400 Kcal/kg). It is ideal for high grade coal demand from sponge iron, and cement industries, which are currently reliant on imported coal of this grade.
